ABSICHERUNG

Safe AI for Automated Driving

11th March 2021, Online, Interim Presentation

AI-based Functions for Pedestrian Detection

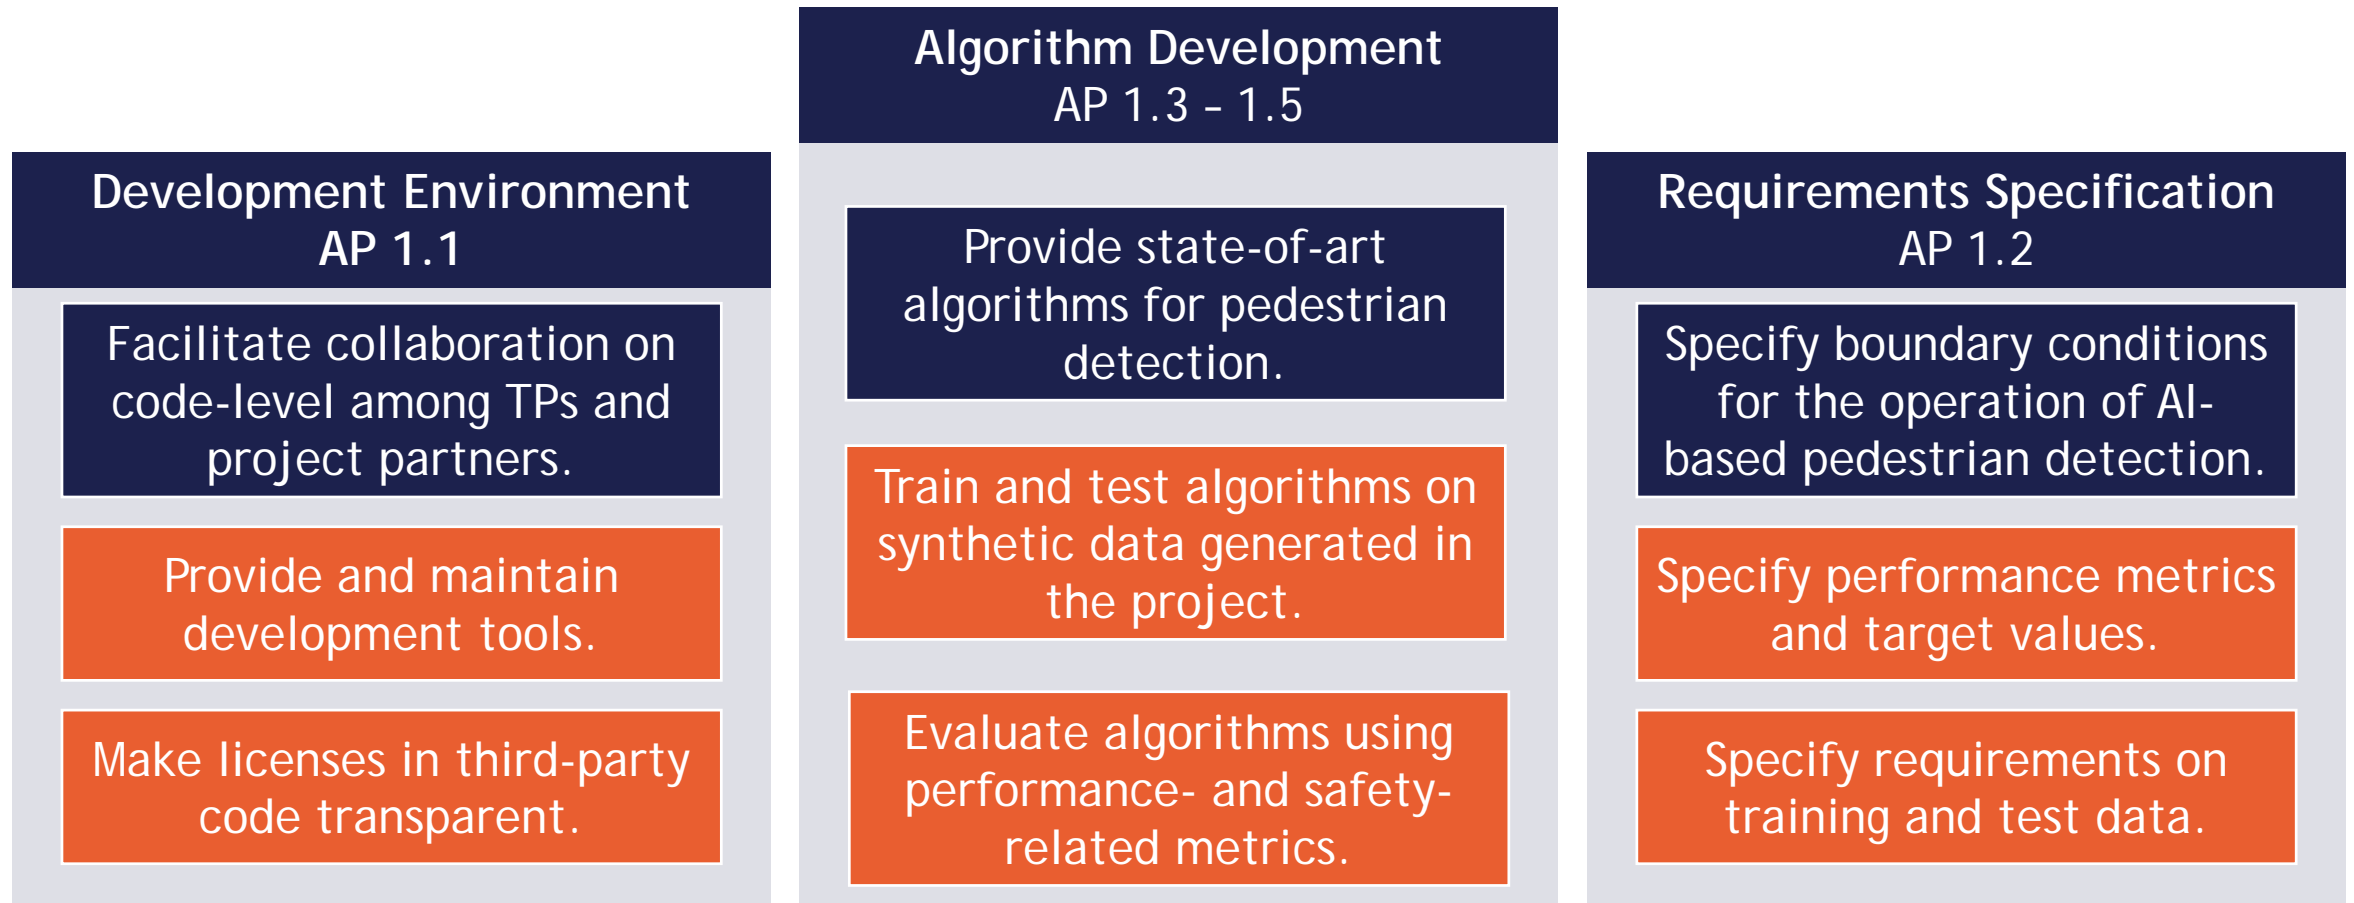

Dr. Loren Schwarz, BMW AG

AI-based Functions for Pedestrian Detection

Mission & Vision

AI-based Functions for Pedestrian Detection Algorithms

TP1 provides state-of-art deep neural networks for pedestrian detection.

Semantic Segmentation

2D-Bounding Box Detection

Instance Segmentation

3D-Bounding Box Detection

3D-Body Pose Estimation

AI-based Functions for Pedestrian Detection Requirements Specification

TP1 specifies expectations on its inputs and targets for its outputs.

AI function specification

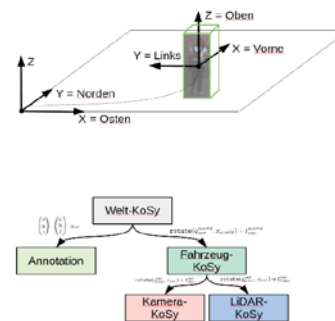

Sensor specifications

| Parameter | Value | Comr |
|------------------|------------------------------|-----------------------------|
| Camera Model | pinhole (no lens distortion) | Could ^d radially |
| Field of View | 60° × 42° | These cropped pixels to th. |
| Pixel Resolution | 1920 × 1280 (5.1 MP) | |
| Aspect Ratio | 1.5:1 | |

Annotation format specification

```
{
  "1380": {
    "c_x": 1460,
    "c_y": 560,
    "w": 24,
    "h": 54,
    "occlusion": 0.2,
    "v_x": 0,
    "v_y": 0,
    "truncated": false
  },
  "1381": ...
}
```

Metric collection

| Metric | Classification | Item category | Application | Item dependency | Definition | Definition | Implementation | Checkbook |
|-----------------------------------|----------------|---------------|-------------|-----------------|-----------------------------------|-----------------------------------|-----------------------------------|-----------------------------------|
| Number of metrics to be collected | Quality metric | Technical | Application | Item dependency | Number of metrics to be collected | Number of metrics to be collected | Number of metrics to be collected | Number of metrics to be collected |
| Time of metric collection | Quality metric | Technical | Application | Item dependency | Time of metric collection | Time of metric collection | Time of metric collection | Time of metric collection |
| Resolution of metric collection | Quality metric | Technical | Application | Item dependency | Resolution of metric collection | Resolution of metric collection | Resolution of metric collection | Resolution of metric collection |
| Number of metrics to be collected | Quality metric | Technical | Application | Item dependency | Number of metrics to be collected | Number of metrics to be collected | Number of metrics to be collected | Number of metrics to be collected |
| Time of metric collection | Quality metric | Technical | Application | Item dependency | Time of metric collection | Time of metric collection | Time of metric collection | Time of metric collection |
| Resolution of metric collection | Quality metric | Technical | Application | Item dependency | Resolution of metric collection | Resolution of metric collection | Resolution of metric collection | Resolution of metric collection |
| Number of metrics to be collected | Quality metric | Technical | Application | Item dependency | Number of metrics to be collected | Number of metrics to be collected | Number of metrics to be collected | Number of metrics to be collected |
| Time of metric collection | Quality metric | Technical | Application | Item dependency | Time of metric collection | Time of metric collection | Time of metric collection | Time of metric collection |
| Resolution of metric collection | Quality metric | Technical | Application | Item dependency | Resolution of metric collection | Resolution of metric collection | Resolution of metric collection | Resolution of metric collection |
| Number of metrics to be collected | Quality metric | Technical | Application | Item dependency | Number of metrics to be collected | Number of metrics to be collected | Number of metrics to be collected | Number of metrics to be collected |
| Time of metric collection | Quality metric | Technical | Application | Item dependency | Time of metric collection | Time of metric collection | Time of metric collection | Time of metric collection |
| Resolution of metric collection | Quality metric | Technical | Application | Item dependency | Resolution of metric collection | Resolution of metric collection | Resolution of metric collection | Resolution of metric collection |

AI-based Functions for Pedestrian Detection

Intermediate Key Learnings

Getting research and safe product development objectives under one roof can be challenging.

Anticipating expected performance of an algorithm that is under development is almost impossible.

Specifying how to generate synthetic data with a realistic degree of variation is non-intuitive.
